

Learning update

Friday, 28th June

Why don't you ask me about my learning this week? We have done lots of things that include:

English – Recapping the events in 'The Highwayman', comic stripping the events.

Maths – Problem solving

Geography – created a river booklet on the Amazon or the Colorado river, why do people dam rivers, what is the impact of damming rivers?

PE – Athletics

French -

Art – Etching a lino print, using the print to create artwork.

Bikeability programme.

Play practice.

It's been another odd week for Year 5. Only half have them been in class at any one time! We have completed lots of topic work; creating a booklet on the individual features of a major world river and debated the impact of damming rivers.

Most of our week has been taken up with cycling! The Bikeability instructors were very impressed with the children's skills. The children who took part have received certificates and badges from the instructors today. On the reverse of the certificates, there are some tips on how the children can improve.

Next Wednesday is Sports Day (weather permitting). A letter went out this week detailing timings. KS2 will be competing in the afternoon. The children have been practicing hard in PE to improve their throwing, jumping and running.

Have a wonderful weekend – stay safe in the sun!
