English- In English we spent time learning our imitate text and wrote some build up sections. We also had fun thinking of our own characters for a similar version of the story. During World Book Day, we made a split pin giant too (which linked to our D.T. unintentionally!).

Maths- We continued thinking about time focusing on how many minutes are in an hour. We jumped in our five times table to support reading times past and to the hour.

Science- Plants, plants and more plants. We have conducted an experiment looking at what conditions might affect a plant's growth. We have also planted some Marigold seeds separately whilst thinking about the stages of a plant's growth.

D.T. We explored what makes a good mechanism with a lever and a pivot. We then created some of our own seesaw lever pictures where the characters moved in a curved line from the pivot.

Geography- We thought about why animals in the rainforest might be endangered and focused on the Jaguar; thinking about loss of land, farming and illegal trades that affect animals.

Music- In Music we looked at musical structure with Mrs Grosvenor.

P.E. We explored the difference between attacking and defending.

Have a great weekend and it was great to meet this week at Parent's Evening.

Thanks,

Mr T
