YEAR 2 NEWS

ning update Learning update Learning update Learning update Learning upd

We are in our penultimate week yet still working incredibly hard!

English: We've finished our innovated texts and focused on editing for spellings and key punctuation.

Maths: We have looked at finding change before exploring some multistep problems.

Science: We thought about asking scientific questions related to plants and then our experiments. We started to think about conclusions comparing our two plants we grew.

D.T. We made a device with two levers and pivot; selecting from a range of materials. We then tested it out.

R.E. we spent a long time thinking about the symbols of easter and how important each of them were.

PSHE: We talked about how different activities on the internet made us feel. We started to think about who we could talk to if something made us feel uncomfortable. We also talked about search engines. Here is a link to a child safe search engine called Kiddle that you might want to try with your child. <https://www.kiddle.co/>

Geography: It has been fascinating for us to explore the Yanimami people of the Amazon Rainforest over the past two weeks. We thought about why they might depend on the rainforest for survival.

Computing: We thought about machine learning using Quick Draw to talk about how A.I. thinks and learns. We then tried to create our own 'Lego style' algorithms for a multilink creation. Here is the link for Quick Draw for your child to try at home. <https://quickdraw.withgoogle.com/>

Music: Mrs Grosvenor and musical structure.

P.E: Mrs Crook attacking and defending.

Have a great weekend!

One more week to go.

Mr T
