YEAR 2 NEWS

ning update Learning update Learning update Learning update Learning upd

In Year 2, we have been busy learning; coming to the end of most of our topics in each subject.

English- We have been writing our invent texts using lots of noun phrases and conjunctions based on the Mr Penguin book.

Maths- It has been great to spend time understanding subtraction and thinking about counting on as a strategy.

Science- We discussed why our experiments worked or didn't work. We also talked about why plants are important.

PSHE- We had a qualified dentist come and talk to us about why it's important to brush our teeth. We even got some goodies to take home (definitely not sweets!).

Computing- We spent time creating algorithms for a robot and building them. We then thought about why debugging is important as a process in computing.

DT- Our challenge was to design a litter picker using our knowledge of levers and pivots.

Music- Mrs Grosvenor continued to be impressed with our confidence noticing musical structure.

Geography- We spent time looking at different people who interact with a rainforest and why they might do what they do.

RE- Mrs Grosvenor helped us to reflect on our understanding of Jesus' death and resurrection from a Christian perspective.

PE- Mrs Crook continued to teach us attacking and defending.

Have a great easter holiday! Enjoy the well-deserved rest.

Thanks

Mr T
