Learning update

We've begun the term as we mean to go on; working hard. We also started this term with an exceptionally fun activity day!

English: We've started a new unit of writing looking at Izzy Gizmo including thinking about vocabulary and rhyming patterns in the text.

Maths: It has been amazing how confidently we've started our learning journey with fractions thinking about wholes and parts.

Science: Our knowledge of British wildlife in different habitats has been excellent. This week we've really explored what we know.

History: We have started a new topic all about the history of technology. We started reflecting how transport had changed before discussing our favourite technology.

Computing: We revisited our important touch typing skills.

Music: We started a unit all about call and response with Mrs Grovesnor.

PSHE: It was important to talk about all the ways that we can stay safe at home. We were excellent at identifying hazards in the home.

Activity Day: Monday was brilliant. We played team games, made stick bread, tried archery, fired bottle rockets and saw a range of birds (they even perched on our arms).

Please talk to your child about ensuring that they drink plenty of water. I have been seeing lots of children coming in looking dehydrated after lunch time. We do of course give frequent reminders!

Also please ensure that reading is a priority. If routines have been less frequent during Easter break, aim to get back into those as quickly as possible. Year 2 have had some great star percentages this year! Let's keep it up.

Have a great weekend!
