What have we done in class this week??

This week we have practised lots of skills.

English: We finished our innovated texts with our own inventors and animals. We then edited them. This was our best work yet! We also explored a fictional text looking at vocabulary and ordering the story.

Maths: We have been looking at addition where there is regrouping or when we are adding more than one multiple of ten.

Science: We thought about what might be in a pond habitat. We also explored pond life in our school pond through doing some pond dipping! It was great fun!

History: We connected the invention of the Printing Press and the invention of the World Wide Web as revolutionary ways that spread information during their time periods. We discussed how we use the internet to find information and how to be safe. We looked at the figures William Caxton and Sir Tim Berners Lee.

Computing: We explored shortcuts and what the toolbar does when word processing in Microsoft Word. We really played around with the text editing features. Again, this was quite fun!

Music: Mrs Grosvenor and also a musical performance from Dalcroze ahead of next week's Proms in the Playground! How exciting!

P.E. was practising for Sports Day with Mrs Crook.

PSHE: We explored a range of situations outside the home where there might be dangers and how to avoid them.

R.E: We explored why Jesus' followers chose to trust him and follow him. We consolidated our understanding of what trusting and being trustworthy means.

Have a great weekend.

Kind Regards,

Mr Turner
